

Assessment Plan

AI Transformation with Microsoft Copilot

TGS-2024044051 • v2.0 • 27 September 2026 • WSQ • 3 days / 24 hours

Tertiary Infotech Academy Pte Ltd • UEN 201200696W

Trainer controlled document. Use synthetic learner data only.

Assessment overview

Assess the four approved WSQ outcomes with one Written Assessment (WA) and one Practical Performance (PP). The final two hours are part of the 24-hour course. Candidate work uses synthetic Northstar Service data and may use an approved Copilot work account or a clearly labelled offline equivalent.

Method	Duration	Candidate evidence	Decision
WA	60 min	Three applied executive questions covering K1–K3	C/NYC against controlled marking guide
PP	60 min	Four decision artifacts covering A1–A5	C/NYC against controlled evidence rubric

Outcome and criterion map

Outcome	Knowledge evidence	Performance evidence
LO1 · Implementation and process	K1 · outcome, pilot, Copilot use and baseline	A1–A2 · mandate and implementation plan
LO2 · Security controls	K2 · sources, verification and human approval	A3 · responsible-use and control charter
LO3 · Integration alignment	K3 · use-as-is, extend or build trade-offs	A4 · integration decision and workflow test
LO4 · Optimization	K3 · adoption, quality, risk and value	A5 · value model and board go/hold recommendation

Administration

- Confirm candidate identity and issue only the current v2.0 WA/PP candidate papers. Keep answer keys and assessor decisions outside public learner locations.
- State time, open-book rules, permitted synthetic data, tool access and submission format before starting. An offline path must be labelled simulated.
- Provide approved reasonable adjustments without changing the standard. Record the adjustment and the evidence still required.
- Collect each candidate's own source-backed decision artifacts; do not coach toward a particular recommendation.

Evidence and decision

- Check the source behind each material claim and figure. Reject unsupported savings or a simulated action described as deployed.
- Check decision owner, approval gate, counterargument, risk response and a measurable outcome for every relevant task.
- Award Competent only when every required criterion is met. Otherwise record Not Yet Competent with the specific gap and reassessment action.
- Store submissions, assessor decisions and reassessment records in the approved controlled location under provider retention rules.

Related documents

Use the v2.0 Trainer Slides, Learner Guide, Lesson Plan and ten executive labs for instruction. The WA and PP candidate papers are the only learner-facing assessment instruments; marking guides are assessor-only.
