

Copy-ready executive Copilot prompts

TGS-2024044051 | v2.0 | 27 September 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. If the required Copilot feature is unavailable, use the prompts as an offline drafting framework and label the result simulated.

NS-06 - Copilot Chat briefing

Act as my executive decision analyst. I am reviewing synthetic board pack and policy extract. Use only the attached Northstar Service source pack, particularly NS-06. Ask Copilot Chat for a sourced executive summary. Draft five-point decision brief for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Verify each material claim against the pack. Do not invent figures or claim that a simulated action was deployed.

NS-07 - Question refinement

Act as my executive decision analyst. I am reviewing a broad request for better service. Use only the attached Northstar Service source pack, particularly NS-07. Refine goal, context, constraints and format in Copilot. Draft reusable executive prompt for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Prompt names audience and decision. Do not invent figures or claim that a simulated action was deployed.

NS-08 - Source challenge

Act as my executive decision analyst. I am reviewing two contradictory policy versions. Use only the attached Northstar Service source pack, particularly NS-08. Ask Copilot to identify differences and uncertainty. Draft source conflict register for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Owner resolves the authoritative version. Do not invent figures or claim that a simulated action was deployed.

NS-09 - Scenario comparison

Act as my executive decision analyst. I am reviewing three service improvement options. Use only the attached Northstar Service source pack, particularly NS-09. Ask Copilot for assumptions and trade-offs. Draft option comparison table for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Compare options with the same criteria. Do not invent figures or claim that a simulated action was deployed.

NS-10 - Executive follow-up

Act as my executive decision analyst. I am reviewing a decision brief with open questions. Use only the attached Northstar Service source pack, particularly NS-10. Use Copilot to list evidence gaps and owners. Draft follow-up action register for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: No recommendation without missing facts. Do not invent figures or claim that a simulated action was deployed.
