

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-06 - Copilot Chat briefing

- Business input: Synthetic board pack and policy extract
- Expected decision artifact: Five-point decision brief
- Named review gate: Verify each material claim against the pack
- Challenge to test: Plausible but unsupported claim
- Outcome measure: Supported claims divided by claims

NS-07 - Question refinement

- Business input: A broad request for better service
- Expected decision artifact: Reusable executive prompt
- Named review gate: Prompt names audience and decision
- Challenge to test: Response is polished but irrelevant
- Outcome measure: Decision-relevant points per answer

NS-08 - Source challenge

- Business input: Two contradictory policy versions
- Expected decision artifact: Source conflict register
- Named review gate: Owner resolves the authoritative version
- Challenge to test: Retired document becomes the basis
- Outcome measure: Current-source citation rate

NS-09 - Scenario comparison

- Business input: Three service improvement options
- Expected decision artifact: Option comparison table
- Named review gate: Compare options with the same criteria
- Challenge to test: One option gets a favourable metric
- Outcome measure: Criteria applied to all options

NS-10 - Executive follow-up

- Business input: A decision brief with open questions
- Expected decision artifact: Follow-up action register
- Named review gate: No recommendation without missing facts
- Challenge to test: Open question disappears from summary
- Outcome measure: Critical gaps assigned to owners
