

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-26 - Executive meeting

- Business input: Synthetic leadership meeting transcript
- Expected decision artifact: Decision and action log
- Named review gate: Chair validates speaker and decision
- Challenge to test: AI assigns an action to wrong owner
- Outcome measure: Confirmed actions divided by extracted

NS-27 - Outlook decision flow

- Business input: A crowded executive email thread
- Expected decision artifact: Prioritised response draft
- Named review gate: Executive reviews tone and commitments
- Challenge to test: Reply contains a false promise
- Outcome measure: Decisions made before deadline

NS-28 - Cross-functional handoff

- Business input: Service and finance joint request
- Expected decision artifact: Future-state handoff map
- Named review gate: Keep accountable human at each gate
- Challenge to test: AI summary blurs ownership
- Outcome measure: Handoff time reduction

NS-29 - Copilot integration choice

- Business input: Microsoft 365 and line-of-business options
- Expected decision artifact: Integration decision card
- Named review gate: Sponsor accepts cost and risk trade-off
- Challenge to test: Custom build is chosen without need
- Outcome measure: Business fit score per option

NS-30 - Agent opportunity

- Business input: A repeatable policy-answer task
- Expected decision artifact: Agent opportunity brief
- Named review gate: Do not automate irreversible decisions
- Challenge to test: Agent scope expands beyond approval
- Outcome measure: In-scope resolution rate

Synthetic leadership meeting note

Chair: The service pilot can proceed for 30 approved seats after the data owner signs the source list. Finance: The SGD benefit is not yet measured; use the synthetic worksheet only as an assumption. Risk lead: Hold external customer messages until the service director reviews them. Action: Operations director to bring a baseline comparison to the next steering meeting on 15 October 2026. Dissent: The finance lead questions whether the current sample is representative.

Synthetic Outlook thread

Subject: Copilot pilot update. From: CEO. Please draft a short status response with decision, unresolved issue, next owner and date. Do not send the reply.
