

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-31 - Vendor and partner review

- Business input: Three proposed AI service options
- Expected decision artifact: Partner decision matrix
- Named review gate: Verify contractual and data claims
- Challenge to test: Marketing claims become evidence
- Outcome measure: Requirements with verified proof

NS-32 - Pilot operating model

- Business input: 30-seat cross-functional cohort
- Expected decision artifact: Pilot operating charter
- Named review gate: Sponsor, data owner and risk lead sign off
- Challenge to test: Pilot has licences but no support
- Outcome measure: Weekly active pilot users

NS-33 - Leadership role modelling

- Business input: Three executive work patterns
- Expected decision artifact: Leader demonstration plan
- Named review gate: Leader shows reviewed outputs and limits
- Challenge to test: Leader promotes unverified output
- Outcome measure: Leaders demonstrating weekly

NS-34 - Change communication

- Business input: Employee concerns and benefits
- Expected decision artifact: Change narrative and FAQ
- Named review gate: Include limits and escalation route
- Challenge to test: Message implies job replacement decision
- Outcome measure: Employee understanding score

NS-35 - Decision escalation

- Business input: Pilot issue affecting customer outcome
- Expected decision artifact: Escalation playbook
- Named review gate: Named sponsor owns pause decision
- Challenge to test: Issue remains open while rollout expands
- Outcome measure: Median time to decision
