

Copy-ready executive Copilot prompts

TGS-2024044051 | v2.0 | 27 September 2026

Use these in an approved Microsoft 365 work account. Attach or paste only the synthetic source pack. If the required Copilot feature is unavailable, use the prompts as an offline drafting framework and label the result simulated.

NS-41 - Excel value model

Act as my executive decision analyst. I am reviewing synthetic task time and cost worksheet. Use only the attached Northstar Service source pack, particularly NS-41. Use Copilot in Excel to analyse observed changes. Draft net time-saved table for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Review time is deducted from gross saving. Do not invent figures or claim that a simulated action was deployed.

NS-42 - Benefit confidence

Act as my executive decision analyst. I am reviewing observed sample and management estimates. Use only the attached Northstar Service source pack, particularly NS-42. Ask Copilot to label evidence strength. Draft benefit confidence register for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Assumption is never described as measured. Do not invent figures or claim that a simulated action was deployed.

NS-43 - Cost of ownership

Act as my executive decision analyst. I am reviewing seats, enablement and support costs. Use only the attached Northstar Service source pack, particularly NS-43. Use Copilot to compare total cost scenarios. Draft total-cost table for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Include recurring change and review effort. Do not invent figures or claim that a simulated action was deployed.

NS-44 - Sensitivity test

Act as my executive decision analyst. I am reviewing low, base and high adoption scenarios. Use only the attached Northstar Service source pack, particularly NS-44. Ask Copilot to vary key assumptions. Draft sensitivity chart with break-even point for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Decision holds under a credible downside. Do not invent figures or claim that a simulated action was deployed.

NS-45 - Investment decision

Act as my executive decision analyst. I am reviewing value model and risk register. Use only the attached Northstar Service source pack, particularly NS-45. Draft a balanced investment memo in Word. Draft fund, hold or stop recommendation for a leadership audience. Show the source behind every material claim, label assumptions, surface the strongest counterargument, and state what the human decision owner must verify. Apply this decision gate: Sponsor signs conditions and budget. Do not invent figures or claim that a simulated action was deployed.
