

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-46 - Quality scorecard

- Business input: Sample outputs and evidence checks
- Expected decision artifact: Quality trend chart
- Named review gate: Any critical safety failure blocks scale
- Challenge to test: Good average masks one severe error
- Outcome measure: Critical failures per sample

NS-47 - Customer outcome

- Business input: Service response and satisfaction data
- Expected decision artifact: Customer-impact summary
- Named review gate: Control for work mix and seasonality
- Challenge to test: AI usage is mistaken for customer benefit
- Outcome measure: Comparable cycle-time change

NS-48 - Board reporting

- Business input: Adoption, value, quality and risk metrics
- Expected decision artifact: One-page board scorecard
- Named review gate: Every number has source and date
- Challenge to test: Board pack hides uncertainty
- Outcome measure: Claims with traceable evidence

NS-49 - Next-quarter roadmap

- Business input: Pilot findings and capacity limits
- Expected decision artifact: 90-day roadmap with gates
- Named review gate: Each wave has owner and stop rule
- Challenge to test: Scale outruns governance capacity
- Outcome measure: Wave gates met on schedule

NS-50 - Executive decision rehearsal

- Business input: Board challenge questions
- Expected decision artifact: Final go, hold or stop record
- Named review gate: Executive states assumptions and dissent
- Challenge to test: Decision is made on a polished demo
- Outcome measure: Decision quality rubric score
