

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-01 — Choose a service outcome

- Business input: Service response baseline and customer feedback
- Expected decision artifact: Pilot opportunity statement
- Named review gate: Sponsor confirms outcome and owner
- Challenge to test: AI use is mistaken for customer benefit
- Outcome measure: Comparable response time

NS-02 — Ask a useful question

- Business input: A vague request to improve service
- Expected decision artifact: Reusable work prompt
- Named review gate: Manager confirms the prompt answers the real question
- Challenge to test: Polished response has no decision value
- Outcome measure: Relevant answers per review

NS-03 — Ground a chat answer

- Business input: Current service policy and two case notes
- Expected decision artifact: Sourced response summary
- Named review gate: Check every material statement against the source
- Challenge to test: An unsupported claim is repeated
- Outcome measure: Verified claims per sample

NS-04 — Compare options in Chat

- Business input: Three possible pilot processes
- Expected decision artifact: Option comparison
- Named review gate: Use the same criteria for all options
- Challenge to test: The preferred option receives easier criteria
- Outcome measure: Options with complete evidence

NS-05 — Share a Copilot Page

- Business input: A reviewed team decision summary
- Expected decision artifact: Shared planning page
- Named review gate: Owner checks content and access before sharing

- Challenge to test: Draft assumptions are shown as decisions
- Outcome measure: Open questions assigned
