

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-06 — Draft a Word brief

- Business input: Approved pilot notes and service baseline
- Expected decision artifact: Reviewed Word brief
- Named review gate: Sponsor checks numbers and recommendation
- Challenge to test: Copilot invents a benefit estimate
- Outcome measure: Verified material claims

NS-07 — Refine executive tone

- Business input: A rough draft for a leadership audience
- Expected decision artifact: Concise executive summary
- Named review gate: Human owner signs the final message
- Challenge to test: Important caveat disappears
- Outcome measure: Decisions understood in review

NS-08 — Create board slides

- Business input: Approved Word brief and baseline chart
- Expected decision artifact: Board presentation
- Named review gate: Trace every chart to approved values
- Challenge to test: Slide claim exceeds the source
- Outcome measure: Figures checked before review

NS-09 — Draft Outlook update

- Business input: Approved pilot decision and open actions
- Expected decision artifact: Unsent status draft
- Named review gate: Sponsor approves recipients and commitments
- Challenge to test: An unapproved promise is sent
- Outcome measure: Messages approved before sending

NS-10 — Use Researcher carefully

- Business input: Synthetic policy and market question
- Expected decision artifact: Source and uncertainty list
- Named review gate: Validate dates, claims and relevance

- Challenge to test: Research summary treats weak source as fact
- Outcome measure: Sources verified
