

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-41 — Measure time honestly

- Business input: Baseline, assisted and review minutes
- Expected decision artifact: Net-time table
- Named review gate: Check formulas and comparable work
- Challenge to test: Review time is omitted
- Outcome measure: Net minutes per task

NS-42 — Measure quality

- Business input: Sample drafts and correction log
- Expected decision artifact: Quality scorecard
- Named review gate: Critical error is reported separately
- Challenge to test: Average quality hides material failure
- Outcome measure: Critical errors per sample

NS-43 — Measure adoption

- Business input: Seat assignments and actual useful sessions
- Expected decision artifact: Adoption chart
- Named review gate: Define productive use per role
- Challenge to test: Seats are presented as adoption
- Outcome measure: Productive users per cohort

NS-44 — Estimate total cost

- Business input: Synthetic licensing, training and review costs
- Expected decision artifact: Scenario table
- Named review gate: Label assumptions and sensitivity
- Challenge to test: Licence is the only cost
- Outcome measure: Cost per verified outcome

NS-45 — Decide investment

- Business input: Value, quality and risk records
- Expected decision artifact: Investment decision memo
- Named review gate: Sponsor signs conditions

- Challenge to test: Optimistic forecast is described as measured
- Outcome measure: Conditions met
