

Northstar Service source pack

All Northstar Service names, policies and values are synthetic training material. They are not a claim about a real company or a Microsoft tenant.

Executive context

Northstar Service is a fictional service organisation. Its leadership is considering a 30-seat Microsoft 365 Copilot pilot. No real customer records are included. The CEO requires a decision that names the business outcome, data owner, reviewer, measure and stop condition.

Current policies

- BRD-1: External customer commitments require human approval by the service director.
- BRD-2: A board recommendation must distinguish measured pilot results from assumptions.
- BRD-3: Confidential source files may be used only by approved roles; an unexpected Copilot citation triggers an access review.
- BRD-4: Unresolved high-impact safety failures require a hold decision.

Case facts

NS-46 — Prioritize use cases

- Business input: Five candidate Copilot opportunities
- Expected decision artifact: Opportunity portfolio
- Named review gate: Reject ownerless opportunity
- Challenge to test: Highest volume is treated as highest value
- Outcome measure: Validated value per case

NS-47 — Design ninety days

- Business input: Pilot observations and manager capacity
- Expected decision artifact: Ninety-day roadmap
- Named review gate: Each wave has owner and gate
- Challenge to test: Rollout outruns support
- Outcome measure: Wave gates met

NS-48 — Tell the board

- Business input: Verified pilot outcome and open risks
- Expected decision artifact: Board scorecard
- Named review gate: Every claim has source and date
- Challenge to test: Risk disappears from narrative
- Outcome measure: Claims traceable

NS-49 — Challenge the case

- Business input: A confident recommendation and downside scenario
- Expected decision artifact: Decision challenge log
- Named review gate: Executive answers strongest objection
- Challenge to test: Polished demo substitutes for evidence
- Outcome measure: Objections resolved

NS-50 — Make the call

- Business input: Portfolio, roadmap and scorecard
- Expected decision artifact: Signed transformation decision
- Named review gate: Owner names next review date

- Challenge to test: Decision has no accountable owner
- Outcome measure: Conditions met on time
